The Moral Instinct Questions

1. Differentiate between Kohlberg’s views on moral reasoning and Haidt’s views on moral rationalization. Give examples of scenarios used to develop each. Under what kinds of situations might each apply? (3 pts)

2. How does the Green, et al fMRI experiment using the trolley problem help us determine which view is correct. Make sure to describe the rational, methods, results of that study. (6 pts)

3. How does the study about damage to the ventromedial prefrontal lobe tie in to moral decision-making. (1 pt)
