<td>100</td>
</tr>
<tr>
<td>Graded homework total</td>
<td>105</td>
</tr>
<tr>
<td>Total</td>
<td>705</td>
</tr>
</tbody>
</table>

**Mid-term Exams:** Exams will be held in class on the following dates: **Tuesday, September 21, Tuesday, October 19 and Friday, November 19.** Please note that the third exam is scheduled just before Thanksgiving vacation. There are no makeups for exams. If a student misses an exam and (1) the student informs me before the exam, and (2) the student is able to provide written verification for missing the exam for a legitimate reason (e.g. extreme illness, death in the immediate family), then that student will receive the percentage scored on the final for the missed exam grade. If either of (1) or (2) is not satisfied, the student will get a zero on the exam. The above procedure can be applied only once.

**Final Exam:** Fri., December 10, 3:30-5:30, location TBA

**Quizzes and practice homework:** It is extremely important that you keep up with the practice homework assignments (see list for this section) in order to keep from falling behind in the course. You should expect to take at least one quiz most weeks. Quizzes will be on Thursdays or announced at least one class in advance. There are no makeups for quizzes, but the lowest two grades will be dropped. If you are absent on a day a quiz is given, that will count for one of your dropped quizzes.

**Graded homework:** There will be seven graded homework assignments during the semester, worth a total of 105 points. The graded homework assignments will be posted on the Blackboard website and are due at the beginning of class on each due date. See the calendar for due dates.
Other important dates:

- Mon., Aug. 30 - Last day to change sections or add
- Mon., Sept. 27 - Last day to drop without a grade
- Mon., Nov. 1 - Last day to withdraw from a course
- Wed. Dec. 8 - Last day of classes

Prerequisites for Math 1700: Math 1500 (calculus I), with a grade in the C range or better, equivalent transfer credit or credit from an AP exam.

IMPORTANT (from the math department): “If you are enrolled in this course and the MU systems shows that you are not satisfying the required prerequisites, the Mathematics Department will drop you from the class AFTER the last day for add/drop has passed, at which time, you will not be able to add another course. It is your responsibility to provide appropriate documentation for satisfying prerequisites and to check that the corresponding documentation has been entered in the MU system.”

Attendance: It is the student’s responsibility to attend classes. You are responsible for any announcements made in class. A student with 10 or more absences and an exam average of under 75% may be withdrawn from the class (with an F if appropriate and after the drop date). A student with good attendance and good class participation (asking and answering questions) can earn a few extra points.

Grading questions: If you feel that your exam, quiz, or homework has been misgraded, please bring it to my attention within one week of the day the exams (quizzes/homework) were returned to the class.

Web Resources: I plan to post copies of handouts and the solutions for quizzes and exams on the Blackboard page for this class. (bblearn.missouri.edu)

More sources of help: There will be calculus help sessions held in Strickland throughout the semester. Times and locations will be announced (and are generally posted outside the labs). The Learning Center also offers help sessions for calculus—times and locations will be announced in class.

Academic Honesty: Any work which you submit for a grade must be your own. When you have doubts about what collaboration is allowed, consult me.

University Statement: “Academic honesty is fundamental to the activities and principles of a university. All members of the academic community must be confident that each person’s work has been responsibly and honorably acquired, developed, and presented. Any effort to gain an advantage not given to all students is dishonest whether or not the effort is successful. The academic community regards academic dishonesty as an extremely serious matter, with serious consequences that range from probation to expulsion. When in doubt about plagiarism, paraphrasing, quoting, or collaboration, consult the course instructor.”

From our department: ”If cheating is suspected on any course work or examination, the instructor will follow all procedures allowed by the MU faculty regulations, including the reporting of the incident to the Provost Office and the possibility of submitting a grade of F in the course.”
Further information may be found at http://provost.missouri.edu/academic-integrity.html and http://www.missouri.edu/mufcwww/facultyhandbook/acreg/art6.htm.

ADA: “If you need accommodations because of a disability, if you have emergency medical information to share with me, or if you need special arrangements in case the building must be evacuated, please inform me immediately. Please see me privately after class, or at my office. To request academic accommodations (for example, a note taker), students must also register with Disability Services (http://web.missouri.edu/accesscm), S5 Memorial Union, 882-4696 or 882-8054 TTY. It is the campus office responsible for reviewing documentation provided by students requesting academic accommodations, and for accommodations planning in cooperation with students and instructors, as needed and consistent with course requirements. Another resource, MU’s Adaptive Computing Technology Center (http://iatservices.missouri.edu/adaptive), 884-2828, is available to provide computing assistance to students with disabilities. For more information about the rights of people with disabilities, please see ada.missouri.edu or call 884-7278.”

Miscellaneous:

Cell phones should be turned off during class.

Unless explicitly said otherwise, you should not be logged in during class time. Those who are inappropriately logged in may be counted absent.

You must show your work on exams, quizzes, and homework. Unsupported answers may get no credit, as may the correct answer arrived at by an incorrect or incomplete method. However, in general partial credit is possible for a correct method with minor mistakes.

You will not be allowed to use calculators during quizzes or exams.

If you have any problems or concerns regarding this course, please report it to: Amanda Clayton, Calculus Coordinator (phone: 882-5353, email: claytona@missouri.edu) or to Professor Ian Aberbach, Director of Undergraduate Studies (phone: 882-4898, email: aberbachi@missouri.edu). Amanda Clayton should be your first contact.

“The University community welcomes intellectual diversity and respects student rights. Students who have questions concerning the quality of instruction in this class may address concerns to either the Departmental Chair or Divisional leader or Director of the Office of Students Rights and Responsibilities (http://osrr.missouri.edu/). All students will have the opportunity to submit an anonymous evaluation of the instructor(s) at the end of the course.”
