Subject: Request for Items for January 2012 MURR Report

Ladies and Gentlemen,

This is a call for items for our next MURR Report, slated for **late January 2012**.

Please help make our internal newsletter enlightening and interesting by submitting newsworthy or noteworthy bits of information/story lines. Do not worry—if you suggest a topic, it doesn't necessarily mean you are responsible for writing it, so, please, speak up!

I certainly rely on each of you and those who report to you to help make our internal newsletter enlightening and interesting by submitting newsworthy or noteworthy bits of information/story lines. Do not worry—if you suggest a topic, it doesn't necessarily mean you are responsible for writing it, so, please, speak up! If you group is working on, about to start or complete, or just finished a project, let us hear about it.

What are your staff and students doing? Send a heads up (or ask them to contact me) about their projects, their plans, what presentations they have or will be making, what brought them to Mizzou and MURR, whatever. It does not have to be polished; I will follow-up with the individuals myself if you give me enough information.

What projects/collaborations are you working on?

Have you heard from a former MURR student or employee?

Any recent publications of note, grant awards ...??

What about a bio? Please nominate yourself or individuals from your group willing to share their story with us.

MURR MATTERS Any stories or tidbits, links to company press releases, etc., related to how what we do is making a positive impact on people's lives.

If possible, respond by 5pm Thursday, January 19, 2012. Late submissions are always welcome. If they cannot be included in this edition of the MURR Report, we'll make an effort to work them into a future issue.

STANDARD "Particulars"

Jeff Attebery – fiscal issues

Chris Barnett – computer issues

Don Bryan – computer issues
Ken Brooks – business development, central services matters
Ralph Butler – organizational/administrative/upcoming trips/meetings of note
Cathy Cutler – biomedical research
Ron Dobey – health physics, ALARA issues, upcoming projects that might affect day-to-day operations
John Ernst – regulatory issues
Missy Evans-Blumer – MSOC
Mike Flagg – special projects
Les Foyto – overall reactor and facilities operations
Galynn France – reportable HR items
John Fruits – Operations issues, projects
Amber Gaddy – Document Control
John Gahl – materials science program items
Mike Glascock – Archaeometry projects
Mike Kraus – CAP updates/news; safety matters
Alan Ketring – medical radioisotopes
Catherine Mohesky – training
Gayla Neumeyer – workforce development, nuclear science and engineering education
Wale Oladiran – engineering issues
Mark Richardson – Work Control–upcoming/ongoing/recently completed projects/phases
Dave Robertson – research and education
Matt Sanford – products and services matters
Margee Stout – interesting travel destinations by any MURR personnel
Hak Taub – neutron scattering matters
Marc Weichelt – cyclotron program
Mark Whithaus – QA/GXP

Thanks,
Christine
