Ralph,

Approvals needed for PSRS attached for Prelas/Nuclear Engineering proposal (abstract is in email below) with 6% shared credit for Mike Glascock. Mike Glascock and Dave Robertson have signed.

I did send a one line description. GAANN is a program that supports student fellowships.

This is the abstract:

The pool of academicians and researchers in the nuclear science and engineering is gradually shrinking. The end of cold-war and no substantial growth in the nuclear power industry are deterring our young scientists and engineers from pursuing the nuclear science and engineering fields. Also, scientific advancements in these areas require comprehensive multidisciplinary education and research at the cutting edge of science and technology. The proposed GAANN Fellowship program addresses the critical need for human resources in the multidisciplinary field of nuclear science and engineering. The prestigious GAANN fellowships will lead to the induction and nurturing of a talented cadre of outstanding scientists and engineers in this critical area of research and education, thus contributing to the pool of academicians who will serve as role models for future nuclear scientists and engineers.

Mark A. Prelas, PhD and PE

James,

I need a description of the project/abstract/scope of work - something that contains more detail for this project before Dr. Robertson can sign off on this.

James,

Could you please forward a brief narrative/description of the project? Dr. Robertson signs for dept line and always requests one. Thanks!

It is understood that all parties to this submission are in compliance with the Federal Regulations regarding Debarment and Suspension, Drug-Free Workplace, Lobbying, and Federal Debt Delinquency. Conflict of interest and any other requirements published by the sponsor in connection with this funding application. It should be further understood that the approvals given on this form represent general approval of technical merit, allocation of University resources and fiscal budgeting, but do not represent specific approval of personnel title classifications or salary rates. Where funds are requested for the purchase of equipment, a determination has been made that no other equipment at the University is available or accessible or suitable for the intended use in accordance with Manual for the Procurement and Maintenance of Federally Obtained Property.
