Thanks, George. I had thought of this one more as the "action" piece. I agree that Bart's is the concept/vision piece. As I said, this is way outside my area of expertise...just trying to get something operational on paper.

This one is tougher. I want to think about both the \$300,000 and a few other issues you raise in the draft memo. I'm also not sure what purpose this particular document will serve--it's parallel to the NSEI document we've been working on--but it might "steal the thunder" of Bart's vision (in the document he gave to you a few weeks ago). I wonder if we might let Bart and the chancellor write this one? Or could we try to rewrite Bart's document? I'll look at both yours and Bart's next to each other and see how we might make sense of the changes without adding confusion (since I think Bart will want, as dean, for his own vision to predominate).

George

OK, here's another one...this time on reorg of the Truman School. I'm clearly out of my area of expertise, but for what it's worth...
