Subject: HPS meeting schedule

Velma: Could you please request approval for a facility tour on the afternoon of March 1, 2012, for members of the Missouri professional chapters of the Health Physics Society (St. Louis, Kansas City, and mid-Missouri)? We are starting to plan a joint meeting of the three groups, the working agenda for which is shown below, and anticipate no more than 30 people for the MURR part of the event. I'm working with Ron Dobey, John Ernst, Bill Miller, and Jack Crawford from MU...and others from the professional chapters.

Note that the President-Elect of the national Health Physics Society has accepted the invitation to participate in the meeting. If approved, the facility visit will be a good opportunity to make him aware of MURR's capabilities and highlight the workforce development work MURR supports in Radiation Protection.

Thanks,
Gayla
