Subject: campaign priorities
Attachments: Graduate Education Executive Summary V2[2][2].doc

Importance: High

George,

Dave has asked for us to resubmit the campaign priorities for Grad Ed. This is the most current version that I have (including changes to final dollar goals). Are you still fine with the attached? Just wanted to be 110% sure...

Thanks,

--

UNIVERSITY *of* MISSOURI

GRADUATE SCHOOL

Dean's Vision for Graduate Education at the University of Missouri: Support graduate students and the graduate programs that prepare students to excel in and outside of academia.

1. PhD Fellowships (\$10,000,000) -- Graduate Fellowships for department or interdisciplinary degree programs.
2. Peace Corp Fellowship (\$350,000) -- Provides an opportunity for a returning Peace Corps student-volunteer to obtain a graduate degree while serving the local community through various service-oriented projects.
3. Translational Issues (\$250,000) -- By providing a structure for multiple departments, faculty, and students to combine their research, MU can view an issue from all angles, providing a holistic and thorough analysis.
4. GLIMPSE (\$100,000) -- The Glimpse Seminar Program will provide current unrepresented and minority undergraduates with the resources, programming, and assistance needed to achieve their graduate school aspirations.
5. Travel Scholarships (\$1,000,000) -- Travel support provides academic enhancements that are essential to a top-notch graduate education. It not only adds to the holistic academic experience but also enables students to present and network at conferences. These opportunities prepare our students for professional careers.
6. PFF, Post-Docs, Professional and Career Development (\$1,000,000) -- Through Preparing For Future Faculty (PFF), the student group, ACES, and plans for a seminar for doctoral students who wish to pursue careers outside of teaching, the Graduate School has successfully provided a small group of students with this support.
7. MA Post Bac Educational Programs (\$1,000,000) -- Provides Masters opportunities for Graduate Students to pursue programs in education.
8. Dissertation Completion Fellowships (\$500,000) -- The goal behind these fellowships is to provide support so that the student, faculty and University can proudly stand behind a successful dissertation that promotes and advances academia and research.
9. Endowed Research and Teaching Assistantships (\$1,000,000) -- Research and teaching assistantships provide support to the student through a financial stipend.
10. Graduate Student Athlete Assistantships (\$200,000) -- The Graduate Student Athlete Assistantship provides support to former MU student-athletes that are now enrolled in a graduate program. This support helps a group of dedicated students with needed financial support as well as a new "team" in their academic home through their assistantship assignment. This program is at the essence of graduate education, which is central to the Graduate School's mission.
11. Nuclear Science and Engineering Institute (NSEI) (\$1,000,000) -- Through increased fellowship, research and faculty support, NSEI will continue advancing the discovery and preservation of applied knowledge in nuclear science.
12. Professional Science Masters (\$500,000) -- An innovative graduate degree designed to allow students to pursue advanced training in science or mathematics, while simultaneously developing workplace skills highly valued by employers.

TOTAL: \$16,900,000
