**Subject:** Curators' Professor

Ken,

what's your view on the "change of appointment for curators' professors" issue?

First, we haven't changed anybody's appointment.

Second, does switching the department in which a faculty member holds tenure constitute a "change of appointment"?

Third, did we get curator approval when Sudarshan went into NSEI from the College of Engineering? If not, should that be ruled invalid and he should be back in Engineering?

Janese has gone off the deep end--for this, rather than Honors Convocation, to be the top story shows a very sad distortion of priorities.

George

Sudarhan's comment (quoted below) is outrageous.

AntonB (anonymous) says...

President Wolfe, the Columbia administration desperately needs a complete and immediate overhaul.

A must read for anyone interested in MU is realtiger's comments on MU being a kleptocracy (<http://www.columbiatribune.com/weblogs/campus-chatter/2012/may/10/a-question-of-meritocracy/#comments>). This comment was spot on. The nuclear engineering curriculum and program is undergoing a hostile takeover by an unqualified group of non-nuclear engineering degreed faculty for the purpose of getting positioned for the perceived gravy train from the Ameren/Westinghouse partnerships. The fact that the state needs professionals to train a quality workforce in an area where nuclear safety and human health is an absolute must is irrelevant to this administration because it is a classic kleptocracy. In a kleptocracy, if the ruling class has the muscle to take over a lucrative enterprise, it will do so because it is only interested in the money. The rules be hanged. MU's kleptocracy extends from the top of the administration downward. Only the president and curators can take it apart. Missouri deserve better.
