I am traveling and the connection is not the best.

"The University of Missouri-Columbia is exploring dramatically new models for scholarly communication, building on its strengths in journalism, library science, information technology, the libraries, and its broad emphasis on media of the future, Hollingshead said. Much editorial work would be done by students who would work under supervision of faculty to prepare for careers in scholarly communication in the new media world. Utilizing a new business model, publications could include much more than text, such as simulations, audio and other elements."

Does anybody know what this paragraph means? Do these models exist? How many students are working with how many faculty on these dramatically new models? It does sound exciting and I hope all that progress is happening. It would be nice to see that the new models exist and work before one throws out what we have.

Another embarrassment for Missouri. We seem to be a magnet for negative national attention lately. It's hard to imagine a state university of our size without an academic press, but I guess we'll be known for it now... us and North Dakota. Karen

Sam,

The Dean discussed these opportunities with me, see below:

- Advanced Nuclear Cladding and Fuel Materials with Enhanced Accident Tolerance for Current Generation & GEN III+ Light Water Reactors (\$1.17M/yr totaling up to \$3.5M)
- Degradation of Used Nuclear Fuel in Storage (\$1.17M/yr totaling up to \$3.5M)
- Inherently Safe Light Water Reactors (\$2.0M/yr totaling up to \$6.0M)

and suggested that we form nuclear teams in the College to compete based on the Nuclear Engineering Program we have been working on. I would like to discuss with you Tuesday next week, and see what's the best way to proceed. I do have the list of engineering faculty (29 of them) whose expertise is close to the solicited areas.

The Dean wants to engage Gala (MURR, a grant writer who has helped NSEI for their team proposals) and Shelley to help prepare the team proposals generated from the College. Meanwhile, the Dean will call Rob Duncan to have his support of the role engineering will be playing in response to these opportunities.

I will visit you Tuesday next week. Thank you for helping us strategize our approach.

Bob

The Office of Nuclear Energy Issues Call to Universities for Nuclear Energy-Related Integrated Research Project Proposals

The Office of Nuclear Energy (NE) today announced that through its Nuclear Energy University Programs (NEUP) it is now accepting applications from universities interested in conducting nuclear energy-related Integrated Research Projects (IRP).

IRPs represent the program directed component of the NEUP strategy by providing research and development (R&D) solutions that are the most directly relevant to the near-term, significant needs of the NE R&D programs. IRPs complement the other NEUP components, which include Program Supporting and Mission Supporting university-based R&D, University Reactor and Research Equipment Infrastructure Upgrades, and Integrated University Program Student Fellowship and Scholarship Grants.

IRPs are significant, three-year projects that address specific research issues or capability gaps identified and defined by the NE R&D programs, and are intended to develop a capability within each specified area. These projects will be multidisciplinary and require multi-institutional partners.

The following three IRP focus areas are addressed by this fiscal year 2012 Call for Proposals (CFP):

- Advanced Nuclear Cladding and Fuel Materials with Enhanced Accident Tolerance for Current Generation & GEN III+ Light Water Reactors (\$1.17M/yr totaling up to \$3.5M)
- Degradation of Used Nuclear Fuel in Storage (\$1.17M/yr totaling up to \$3.5M)
- Inherently Safe Light Water Reactors (\$2.0M/yr totaling up to \$6.0M)

This CFP includes a set of mandatory requirements and evaluation criteria that will be used to select successful proposals. Applications are due July 9, 2012, and must be submitted using the submittal application at www.neup.gov. NE will likely notify award recipients in September 2012.

To view the solicitation in its entirety, please visit the NEUP website.
