Name: Rainer Glaser
Department: Chemistry
Campus Address: 125 Chemistry
Presentation: Chemistry in Context
Session: 23
Number of Respondents: 10

Questions:
1. How useful was this presentation to you? Feel free to comment on the reasons for your choice.
2. What questions do you still have about this issue?
3. What teaching issues would you like to see discussed at future seminars?

Comments:

1. Very useful; Very instructive, I wish I could have learned Organic Chemistry this way.
   Time constraints

2. Moderately useful

3. Very useful; I’m using news articles on-line to teach about families. You gave me some wonderful ideas to improve what I’m doing! Thanks!

4. Very useful; Very good. Thanks for sharing! Always good to see demonstrations of innovative teaching techniques.

5. Moderately useful

6. Very useful; Helpful to see how coop. Learning is carried out in different disciplines. I love the animated graphic examples.

7. Very useful; Very interesting way to engage students in traditionally “boring” subject.
   How does this really effect learning of chemistry?

8. Very useful; There are lots of new things to me.
   N/A
   How to deal with students
1. Very useful: The presenter explained very well, how organic chemistry can be made interesting for students. Students overall learn a lot of things from collaborative learning.

2. Very useful: I would like to create a similar course for my microbiology class.

3. How do you manage a large class, how do you accomplish everything within the syllabus often having a big teaching load.

4. Technology support & usage.
