April 15, 2000

Dear Dr. Mitrea,

Once again, the Men of Engineering learning community would like to honor those who we deem our most outstanding and influential teachers. The Men of Engineering learning community in Wolpers Hall is dedicated to academics and feels that it is important to acknowledge the teachers who excel in the classroom. Our learning community consists of students who take similar courses. From our common experiences in these classes we have selected an elite group of educators that we would like to honor. Selection is not based on mere popularity, but in the quality of education that we have received thus far. We feel that it is important for those who deserve this honor to be recognized, not only by their peers, but by the students who directly benefit from their talents and efforts.

We are pleased to announce that Dr. Barker, Dr. Mitrea, Dr. Peterson, Dr. Adams, Mr. Groeneman, Mr. Hou, and Mr. McGuire have been selected for this honor.

We are holding a reception on Tuesday, April 25 at 7:00 PM in the main lounge of Wolpers Hall, 800 Hitt St. Your presence would be greatly appreciated. Refreshments will be provided, and an optional tour of the engineering houses will be given. Please RSVP by calling Jase Alpers at 771-3724.

Sincerely,

[Signature]

The Men of Engineering Learning Community
